

# National Pool Plant Operators Certificate

The National Pool Plant Operators Certificate is accredited at Level 3 on the Qualifications and Credit Framework (QCF) and consists of four units.

This qualification provides the necessary underpinning knowledge to understand the requirements for efficient and safe pool plant operation in today's high tech swimming pool industry.

## Course Features

- The design and operation of swimming pool plant.
- How to maintain water that is in "balance" and is safe and pleasant to swim in.
- The principles of testing pool water and the remedial action required to restore ideal conditions.
- The technical requirements for ensuring the safe and effective operation of the pool plant.

## Topics Covered

On completion of this qualification the learner should be able to demonstrate knowledge and understanding of:

- The responsibilities of pool operators to provide a safe pool environment.
  - The causes of swimming pool water contamination.
  - The importance of good pre-swim hygiene
  - The importance of good cleanliness in the swimming pool environment
  - The principles of a simple swimming pool water circulation system
- Plus many more.
